

# Run Sheet 5 — End of Day

After the last run is approved. Two different endings — pick the right one.

## First: tear down tablets (both endings)

- 1 **Confirm the head judge has approved the final results.**
- 2 **Collect the judge tablets. Leave the StickIt box powered and connected.**  
To reach the menu: on the Scoring Computer click "Venue Menu" at the top of the left sidebar (or More %¼ ! "Venue Menu (end of day)" on the meet page). On a tablet, tap "Change role" in the top bar.

## Ending A — more competition days remain (e.g. duals tomorrow)

- 3 **On the menu, tap "Hand Back to Cloud" (Control PIN).**  
It verifies every score against stickitski.com — under a minute with internet. Tonight's bracket work happens on the website; tomorrow you adopt again with a NEW code (Run Sheet 2).

## Ending B — the meet is finished

- 4 **On the menu, tap "Check In Meet" (Control PIN).**  
Same verification; the results become the permanent record on stickitski.com. When it shows "checked in", power everything down and pack the kit.

## No internet? Return via file (either ending)

- 5 **If the button says the cloud is unreachable, tap "Return via file instead" (Control PIN).**  
Scoring stops on the box exactly as with a normal Hand Back / Check In — this is final. The box writes a return file and shows a "Return file" card on the menu.
- 6 **On the SCORING LAPTOP, tap "Download return file" and copy it onto the USB drive.**  
The file goes to the laptop's Downloads folder first — copy it onto the stick. Do not use the STICKITSNAP backup stick; that one stays in the box.
- 7 **From any computer with internet, open the meet on stickitski.com !' More !' "Import venue return file".**  
It asks Hand Back or Check In (pre-set to what you chose), then imports and verifies every score. For a two-day meet do this BEFORE the official releases the meet again in the morning.

**Scoring data is never at risk: it stays on the box, in the return file, and on the backup stick. If the box gets internet back before you have carried the file anywhere, the card offers "Send to cloud now".**
