

STICKIT FREESTYLE SCORING

Live Stream Crew

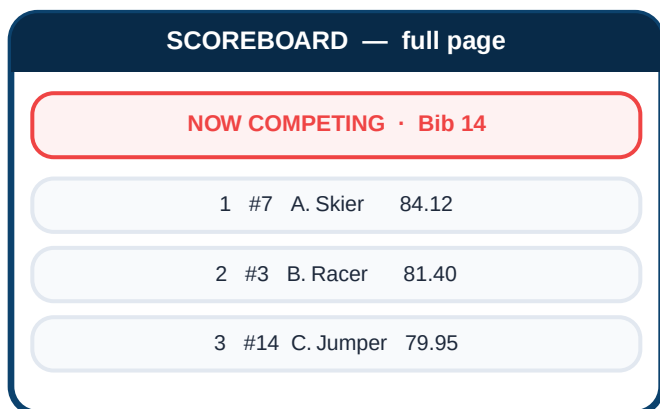

Quick Start Guide

For: Anyone running the broadcast, a lodge TV, or a results screen

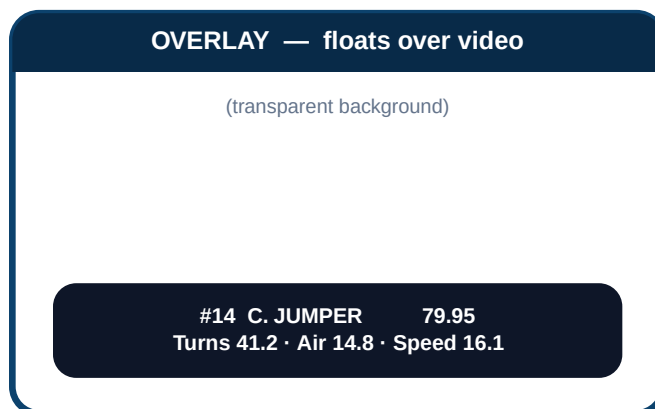

StickIt v2.4.00

The Two Screens You Can Show

Both are just web addresses. Ask the Chief of Score for the event's links.

Great on a lodge TV or a second monitor.

Lower-third graphics for the live stream.

☐ scoring.example.com/scoreboard/AB12CD (scoreboard)

☐ scoring.example.com/overlay/AB12CD (overlay)

OBS setup (60 seconds)

- 1 Add a Browser Source**
In OBS: Sources > + > Browser.
- 2 Paste the overlay address**
The /overlay/... link for your event.
- 3 Set the size**
Width 1920, height 1080. That's it — the background is transparent automatically.

YoloBox: add a URL/web source and paste the same overlay address.

During the Show

- 1 The graphics run themselves**

When a run starts, the athlete's name ribbon appears. When the score is final, it animates in on its own. There is nothing for you to trigger.
- 2 Hiding the overlay (interviews, delays)**

On the scoring computer, the event's Scoring tab has a small "Broadcast Overlay: Hide / Show" control. Ask the Chief of Score to tap Hide — the graphic disappears and stays hidden until Show is tapped or the next run starts.

Broadcast Overlay: **Hide** **Show**
- 3 Dual moguls look different — that's normal**

For head-to-head duals the overlay switches to a Blue-vs-Red versus layout by itself, and shows the winner when the match is decided.
- 4 Sunny outdoor TV? Use Sun Mode**

The Scoreboard page has a sun/moon toggle for a bright high-contrast look. The overlay ignores it on purpose — broadcast graphics stay consistent.

Troubleshooting

Overlay is blank	Check the address — it must be the /overlay/ link for THIS event.
Graphics frozen	Refresh the browser source (OBS: right-click > Refresh). Scores reappear in seconds.
Wrong event showing	Each event has its own link. Get today's link from the Chief of Score.
Score seems behind	The overlay updates within ~3 seconds of the Head Judge approving. Patience beats refreshing.
